(54) Title: MODULAR DRINKS DISPENSER

(57) Abstract: This invention relates to a drinks dispenser, and in particular to a drinks dispenser suitable for use at commercial premises such as a bar or public house for serving beer and the like. According to the invention there is provided a drinks dispenser comprising a frame (14) carrying at least one tap (20), the frame being connected to a column (12) within which can be located a conduit (52) for delivering liquid to the tap, the frame having connectors (30) by which separate and additional frame(s) (16) may be connected thereto, a separate cover (76) being provided which can be mounted upon the frame means. The drinks dispenser is therefore modular in construction, with the frame(s) providing the structural strength of the dispenser and the cover(s) fulfilling the aesthetic requirements.
